Fri, 21 Sep 2018 01:39:00 GMT Catnaps is a personal website and resource for islamic architecture, planning and design, photographs, the cassini and maraldi astronomer families and ww1 military history.

Soil Degradation, Land Scarcity and Food Security ...

Mon, 04 Jan 2016 23:59:00 GMT Soil health, along with water supply, is the most valuable resource for humans, as human life depends on the soil's generosity. Soil degradation, therefore, poses a threat to food security, as it reduces yield, forces farmers to use more inputs, and may eventually lead to soil abandonment. Unfortunately, the importance of preserving soil health appears to be overlooked by policy makers.

History of Earth - Wikipedia

Wed, 19 Sep 2018 19:00:00 GMT The history of Earth concerns the development of planet Earth from its formation to the present day. Nearly all branches of natural science have contributed to understanding of the main events of Earth's past, characterized by constant geological change and biological evolution.. The geological time scale (GTS), as defined by international convention, depicts the large spans of time from the ...

The Geological Society of London's Statement on Climate ...

Sat, 15 Sep 2018 12:45:00 GMT In total, human activities have emitted over 500 billion tonnes of carbon (hence over 1850 billion tons of CO₂) to the atmosphere since around 1750, some 65% of that being from the burning of fossil fuels [18,45,46,47,48].

Dreissena rostriformis bugensis (quagga mussel)

Thu, 20 Sep 2018 23:52:00 GMT Summary of Invasiveness Top of page. *D. rostriformis bugensis* is a bivalve mollusc originating from the estuarine region of the rivers Dnieper and Southern Bug. The expansion of its range in Europe began only after 1940 and likely was associated with construction of interbasin canals and creation of impoundments along the large European rivers (see Orlova et al., 2005).
