Integrating Geographic Information Systems with Hydrological Modeling Chenxiao Ling Abstract During the past two decades, geographic information systems (GIS) have played a more significant role in the realm of science. This paper reviews some representative approaches about the integration of GIS and hydrological modeling.

fields. Training in these technologies - geographic information systems (GIS), remote sensing, global positioning systems (GPS), and photogrammetry - is acquired on the job, through vendors, and in college/university programs that range from individual courses to advanced upper division and graduate programs.

6. Integration of Geographic Information 163 The spatial techniques and applications considered in this chapter are: • Geographic information systems • Spatial decision-support systems • Geographic plume analysis A summary of these integrative approaches appears in Table 6.1. TABLE 6.1. Summary of integrative approaches to spatially ...
