Climate-smart agriculture (CSA) may be defined as an approach for transforming and reorienting agricultural development under the new realities of climate change (Lipper et al. 2014). 1 The most commonly used definition is provided by the Food and Agricultural Organisation of the United Nations (), which defines CSA as "agriculture that sustainably increases productivity ... Climate Change and Disaster Risk Reduction - UNISDR Tue, 11 Sep 2018 02:20:00 GMT 2 Briefing Note 01 ? Climate Change and Disaster Risk Reduction Weather and climate Weather is the set of meteorological conditions – wind, rain, snow, sunshine, temperature, etc. – at a particular

Climate change and livestock: Impacts ... - ScienceDirect

Wed, 12 Sep 2018 20:34:00 GMT Global demand for livestock products is expected to double by 2050, mainly due to improvement in the worldwide standard of living. Meanwhile, climate change is a threat to livestock production because of the impact on quality of feed crop and forage, water availability, animal and milk production, livestock diseases, animal reproduction, and biodiversity.

Causes and Impacts of Land Degradation and Desertification ...

Sat, 15 Sep 2018 23:58:00 GMT Desertification, a phenomenon referring to land degradation in arid, semi-arid and dry sub-humid regions as a result of climatic variations and human activities, is considered as one of the most severe environmental and socio-economic problems of recent times. The principal aim of this study was to explore the impacts of desertification, degradation and drought on both the natural resources ...

Observatorio ARVAL - Climate Change; The cyclic nature of ...

Sun, 16 Sep 2018 04:59:00 GMT Conference on Climate Change - R/B. Lindzen: Understanding The IPCC AR5 Climate Assessment "Carbon restriction policies, to have any effect on climate, would require that the most extreme projections of dangerous climate actually be correct, and would require massive reductions in the use of energy to be universally adopted.
