Sanjiv Kumar - Google Research

A causal loop diagram (CLD) is a causal diagram that aids in visualizing how different variables in a system are interrelated. The diagram consists of a set of nodes and edges. Nodes represent the variables and edges are the links that represent a connection or a relation between the two variables.

Causal loop diagram - Wikipedia

In the system dynamics methodology, a problem or a system (e.g., ecosystem, political system or mechanical system) may be represented as a causal loop diagram. A causal loop diagram is a simple map of a system with all its constituent components and their interactions.

Logic Models Beyond the Traditional View: Metrics, Methods

As presented on table 4.1 above, the R-square (99.2) indicates a "good fit" showing that 99 per cent of the variations in GDP are explained by the combined effect of variations in the explanatory variables.
