My speculation relates to "Superluminal Communication" in the context of a paper by Robert Desbrandes and Daniel Van Gent titled "Intercontinental quantum..."

### **Superluminal Communication | Physics Forums**

Faster-than-light (also superluminal or FTL) communication and travel are the conjectural propagation of information or matter faster than the speed of light.. The special theory of relativity implies that only particles with zero rest mass may travel at the speed of light. Tachyons, particles whose speed exceeds that of light, have been hypothesized, but their existence would violate ...

### **Faster-than-light - Wikipedia**

The phase velocity of a wave is the rate at which the phase of the wave propagates in space. This is the velocity at which the phase of any one frequency component of the wave travels. For such a component, any given phase of the wave (for example, the crest) will appear to travel at the phase velocity. The phase velocity is given in terms of the wavelength  $\lambda$  (lambda) and time period T as
