sustainable development strategy moving pdf

Sustainable development is the organizing principle for meeting human development goals while at the same time sustaining the ability of natural systems to provide the natural resources and ecosystem services upon which the economy and society depend. The desired result is a state of society where living conditions and resource use continue to meet human needs without undermining the integrity ...

Sustainable development - Wikipedia

Sustainable agriculture can be understood as an ecosystem approach to agriculture. Practices that can cause long-term damage to soil include excessive tilling of the soil (leading to erosion) and irrigation without adequate drainage (leading to salinization). Long-term experiments have provided some of the best data on how various practices affect soil properties essential to sustainability.

1. Introduction. According to WWF (2016), the world is using the equivalent of 1.6 planets to support human activities. The finding highlights that there is a huge gap between natural resource supply and human demand. This also indicates that human beings need to live a more sustainable lifestyle (Mont et al., 2014), to ensure a sustainable living environment.
