1. Introduction. The detection and identification of body fluids at a crime scene are very important aspects of forensic science. Determining whether or not there is a body fluid present and subsequently identifying it allows the sample to undergo further laboratory testing including DNA analysis which is a very crucial step in a wide range of investigations.

Very sadly, Dr David Lucy died on Wednesday 20 June 2018. David was perhaps best known in the forensic science community for his work on statistical models for the calculation of likelihood ratios, including his work with Prof Colin Aitken on multivariate kernel density models, and for his 2005 book Introduction to Statistics for Forensic Scientists.
